Actron
Quality Engineered Hardware

Actron Manufacturing

was founded in 1971 by Robert Rechberg, a highly experienced machinist and engineer who learned his trade through the watch-making business in both Germany and the U.S. His original business goal was to design and manufacture innovative latching solutions for the aerospace and marine industries. By the end of its first decade of operation, the company had achieved a reputation among major commercial aircraft customers for well-designed products of superior quality and performance. In 1984, Actron developed a family of precision light-weight drawer slides for the business aviation marketplace.

Today, Actron continues to be an innovator, offering the industry's lightest and quietest latch and slide products at very competitive prices. We are acknowledged as a leader in customer service and product performance by Actron's diverse commercial, business and military aviation, marine, and specialty vehicle customer base. We support the largest network of stocking distributors in the industry, providing timely access to Actron products both domestically and worldwide.

Sincerely,
Frank Rechberg, President

Mission Statement

Our mission is to sustain profitable long-term growth as a leading manufacturer of quality-engineered hardware by exceeding our customers' expectations.

Vision Statement

Actron's vision is to be the recognized global leader of quality-engineered hardware by pursuing new innovative products and applications.

Value Statement

We strive for excellence through partnership with our employees, customers and suppliers, and commit to the highest levels of honesty and fairness.

Engineering

Passionate ingenuity is the foundation of our continued success. We have proven our exceptional engineering to various industries around the globe. Computer-aided design (CAD) is used to create new and precise designs. Our innovative approach prepares us to offer practical, cutting-edge solutions to handle your every application.

Manufacturing

From automated machinery to highly-skilled craftsmanship, our manufacturing capabilities offer our customers quality and diversity. Actron believes in lean manufacturing principles that keep us competitive and efficient in an ever-changing marketplace. Every Actron manufacturing employee is accountable to proactively provide superior workmanship.

Our computer-aided numerical control machine tools maintain product quality at the highest levels and speed orders through the production process. In addition, our Advanced Planning and Scheduling system gives us the efficiency, versatility, and the visibility to offer "REAL TIME" delivery dates each and every time. Our highly-trained and friendly customer service team delivers in-depth application and technical advice.

Quality Assurance

Actron is certified to ISO9001 and AS9100 Quality Management Systems. Our ability to manufacture PMA approved parts is supported by the FAA. Internal audits are conducted regularly to continually improve our ability to offer the highest quality product and meet our customers' expectations.

We continuously conduct research in our test lab, searching for technological advances in materials and methods of manufacturing. Actron uses state-of-the-art stress analysis equipment to produce in-depth reliable data on the durability and capabilities of our products.

Made in USA

Actron invests in the latest machine tool and production control technology, enabling us to significantly raise the productivity of our skilled workforce while maintaining the highest levels of product quality and improving customer service. This strategy allows us to produce our top quality hardware products at competitive prices, and avoid outsourcing any manufacturing or assembly operations to plants outside the U.S.

Actron Products

Latches

Actron offers paddle, push/pull button, sliding, and rotary styles, all designed to meet exacting customer needs. Innovative solutions for galley, lavatory, cockpit overhead bins applications are offered. New designs include smooth-cam products that compliment a wide array of interior design motifs.

Retainers

We offer a broad line of retainers for use in aircraft interiors that can accommodate static loads of up to 3,000 pounds, including quarter turns, door retainers, door hold-opens and push/pull buttons in a variety of materials and finishes to meet virtually any requirement.

Slides

Our enormous selection of ACTRAK® products offer anodized aluminum slide lengths from 4 inches to 5 feet that can accommodate loads from 50 to 1500 pounds. The products employ stainless steel ball bearings in machined raceways for exceptionally smooth and quiet operation.

Mounting Hardware

Actron manufactures an extensive line of fasteners, strikes, escutcheons, brackets and back plates to support your commercial or business aircraft interior design requirements.

Hangers

Need hangers? We make oval, rectangular and round coat and hat hangers in flush-mount and surface-mount styles. They are available in an array of custom finishes to match any décor.

Military Slides

Actron military-grade slides are without equal in the industry. Used on AEGIS DDG-51, F-18 Hornet and HMMWV combat systems, our slides come in top, bottom and side mount configurations. They are engineered to handle loads up to 1500 lbs and meet MIL-S-901D for shock and MIL-STD-810G for vibration. Actron military-grade slides feature shock blocks, stainless steel raceways, captive screws, cable management and variable travel. Customers may specify custom mounting-hole locations for their most exacting applications.

Pulls, Handles, Knobs

You've come to the right place for a wide variety of cup pulls, handles and knobs. They can be ordered in round, oval and rectangular designs in either flush or surface-mount styles. Custom finishes are available upon request.

Miscellaneous

For struts, lock cylinders, hinges, door and drawer openers, extractors, couplings and catches, Actron offers distinctive styles, decorative finishes, as well as concealed hardware and security features.
