PRODUCT GUIDE

Your technical partner for fasteners and hardware

CLARENDON SPECIALTY FASTENERS

SPACE

Clarendon Specialty Fasteners are a leading stockist and manufacturer of aerospace standard fasteners and hardware. We manufacture fasteners that can be made to custom drawings, in a variety of exotic materials, including Titanium, with full material traceability. Manufactured products include inserts for sandwich panels, SEMS Screws and Captive Screws, plus small custom assemblies.

- AS/EN 9100 approved
- Full material traceability
- In-house product inspection
- Application specialists
- FAI reports
- Manufacturer and leading distributor of aerospace hardware
- Technical expertise - support in sourcing and specifying parts

LAUNCHERS & SPACECRAFT

Standard and bespoke aerospace standards

- Aerospace Standard Hardware and Fasteners
- Parts in Metric and Imperial
- Fasteners from leading OEM manufacturers

Products:

Hydraulic Fittings

Drilled Bolts for Safety Wire

Aerospace Screws, Rivets and Nutplates

Keenserts

Composi-lok

SATELLITES

BUS & PLATFORM STRUCTURES

Manufactured inserts for honeycomb and aluminum structures

- Custom made inserts for sandwich panels, available in aluminum and other metals
- Aerospace standard hardware, available in both metric and imperial
- Choice of materials and finishes

Products:

Inserts for Sandwich Panels

Aerospace Standard Nuts & Anchor Nuts

PAYLOAD & INSTRUMENTS

Providing engineered solutions

- Clarendon Made (CM) inserts and fasteners
- Micro-SEMS Screws starting from 1.6mm metric and 2-56 imperial
- Configurations to suit all applications

Products:

SEMS Screws

Composi-Lok

Captive Screws

Rivets

SOLAR ARRAY

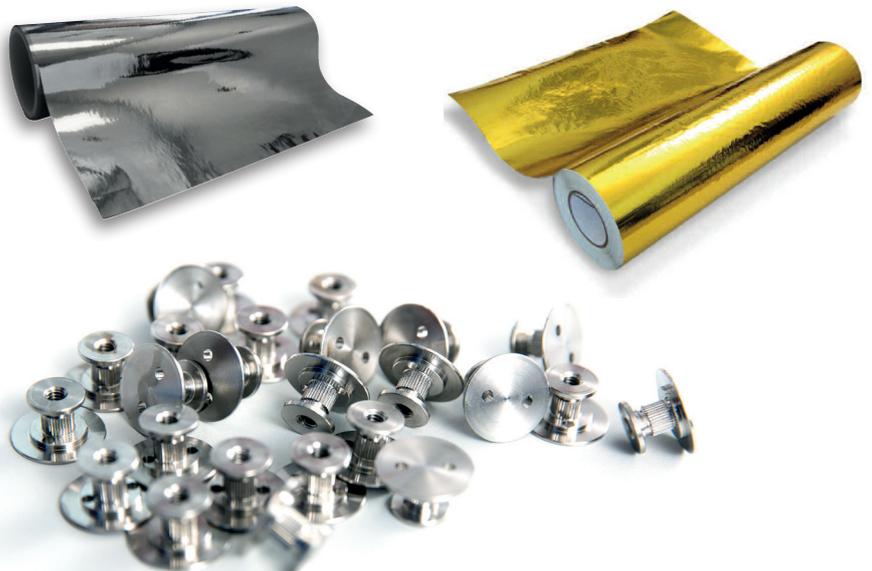

Products made for extreme environments

- Inserts in various materials and finishes
- Manufactured to customer specification
- Heat rejective tapes and films

Products:

Inserts for Composite and Aluminum Panels

Heat Tapes and Films

YOUR VALUE ADDED TECHNICAL PARTNER FOR FASTENERS

Online Tools:

Engineering Catalogue

A comprehensive technical catalogue of aerospace standard hardware and fasteners

SEMS Configurator

Our online tool allows you to configure SEMS specified to your exact requirements

Potted Inserts Configurator

Use our online configurator to specify inserts for your application

Customer Portal

Manage your account online - access orders, quotes and all the information you require at the click of a button!

GLOBAL DISTRIBUTOR

Located in key areas around the globe

Clarendon.AIR

AUTOMATIC INVENTORY REPLENISHMENT

Innovative Kanban/VMI solution through RFID twin-bins

Clarendon AIR provides the capability to automatically manage the inventory requirements of your business through RFID (Radio Frequency Identification) tags which are located in the bin hardware. This provides real time usage for any parts consumed and replenishment notifications transmitted at the touch of a button.
